

Smart Bear Software Signs Siemens Medical, Cognos, and Northrop Grumman

Austin, TX – August 30, 2005– Smart Bear Inc., the industry leader in code review solutions, continued fueling its strong growth with the addition of 3 new major customers. The 3 major customers are: Siemens Medical, Cognos, and Northrop Grumman. These customers accounted for over 500 seats of CodeReviewer, CodePickle, and CodeHistorian.

“Our customers typically start using CodeReviewer in one or two development groups, then other groups begin adopting our solution rapidly” said Albert Springall, Vice President of Sales. “We are very pleased to see such marquis customers implement our technology on a wide-scale basis”. Smart Bear’s products allow companies to automate and facilitate the peer code review process by providing a collaborative peer code review environment.

Smart Bear has over 600 customers worldwide actively deploying multiple products to facilitate peer code review, code metrics and analysis.

“We expect to continue our growth as current customers add development groups, and new customers adopt our technology, we are in discussions with several companies ranging from Fortune 500 companies to small development shops to implement our products at enterprise levels” added Springall.

About SmartBear

Smart Bear provides collaborative peer code review, code analysis, and microbranching solutions for software development organizations. Adobe, Pfizer, Northrup Grumman and 600 other companies rely on Smart Bear’s technology to manage the peer code review process and provide an environment to audit, and track code changes and metrics.

Smart Bear offers solutions that meet the needs of all industry verticals and all size organizations, including SMB, corporate divisions, large retail/direct marketers, agencies, enterprises and not-for-profits. Privately owned and headquartered in Austin, Texas.
